

# The ecosystem of technologies for data collection, survey and analysis in the social sciences

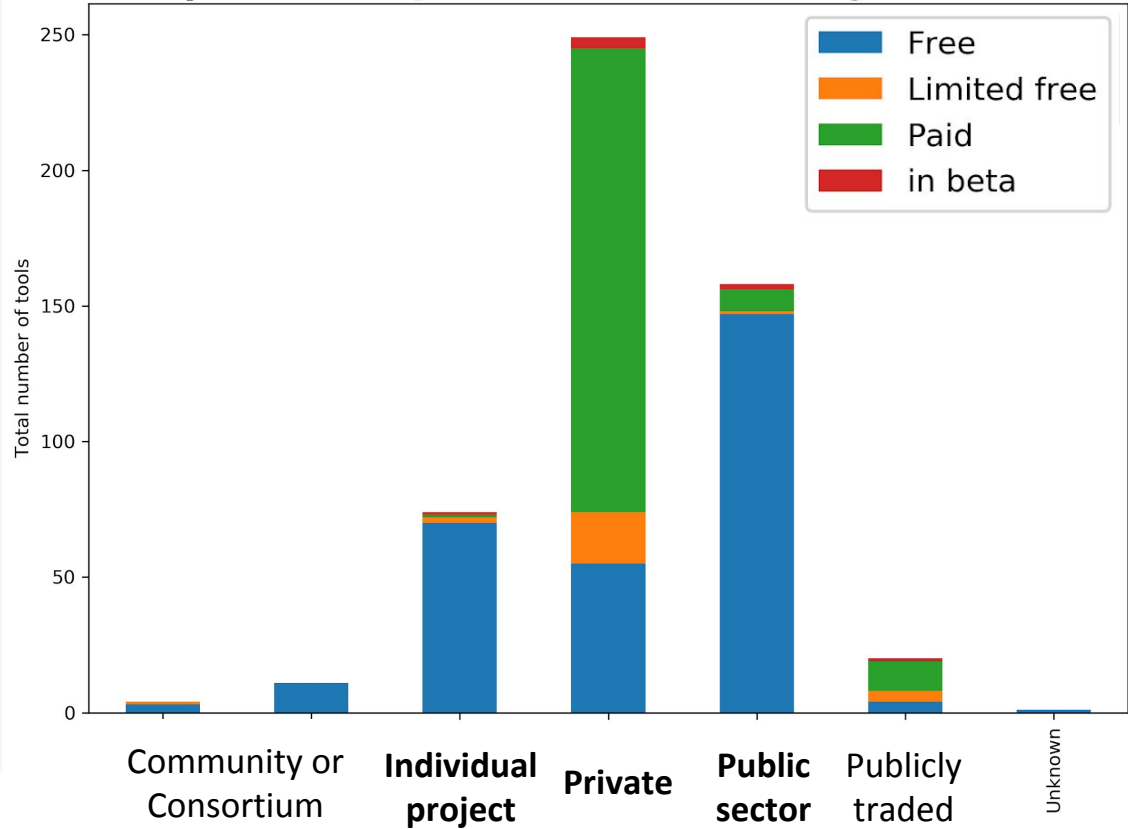

Katie Metzler & Daniela Duca

An initiative dedicated to  
equipping **social scientists**  
with the **skills, tools** and  
**resources**  
they need to work with  
**big data** and **new technology**

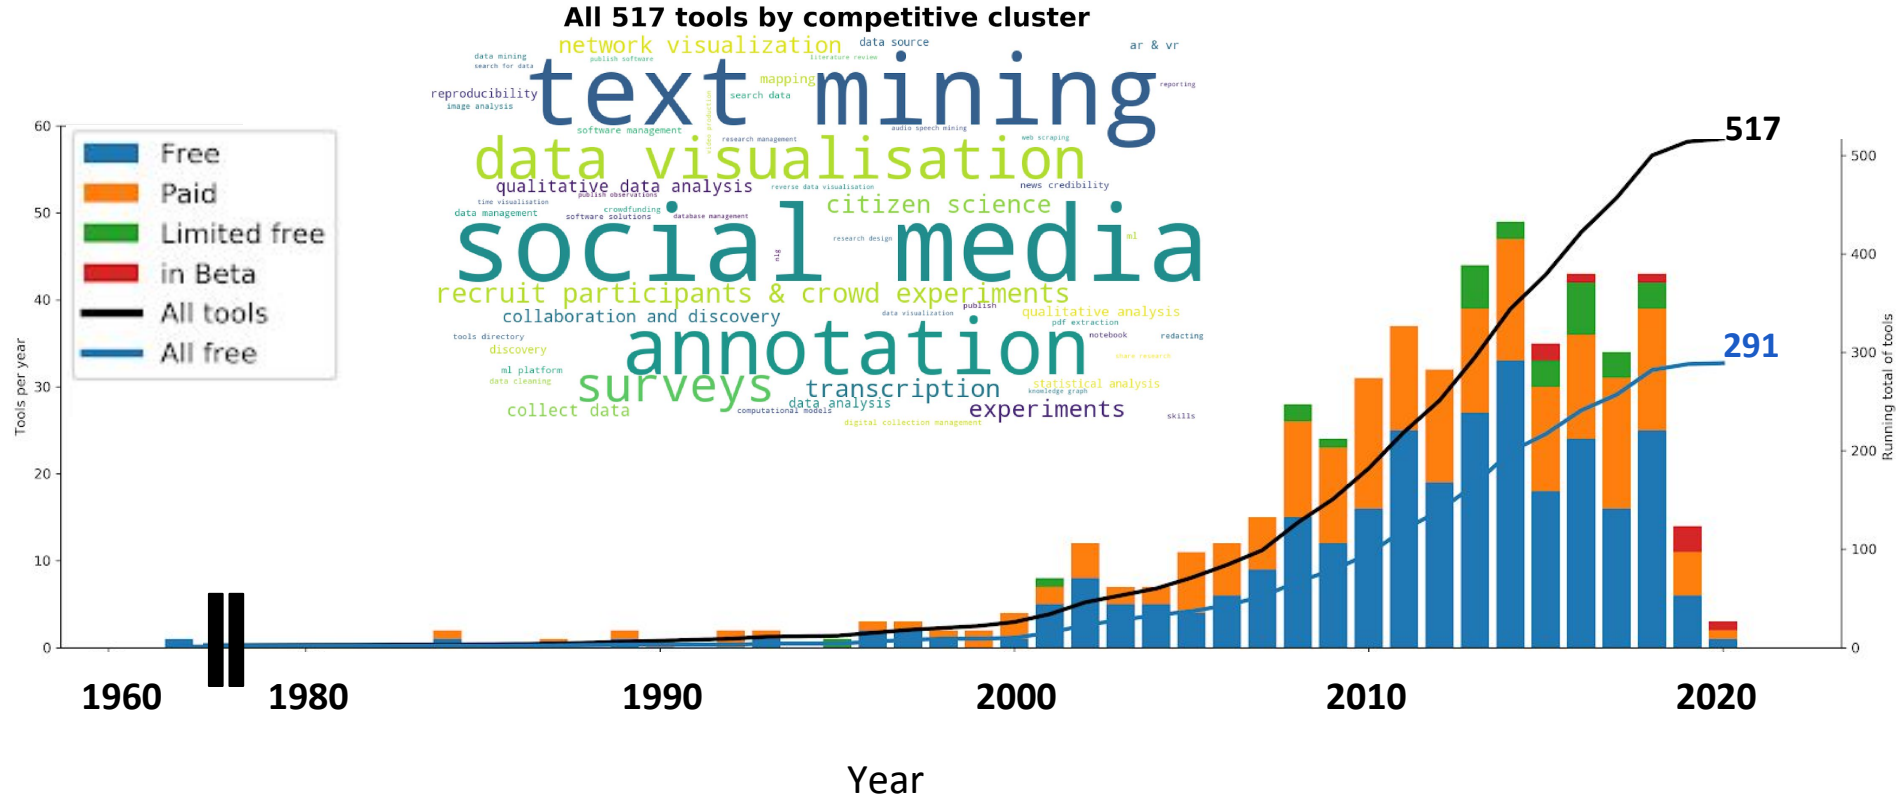

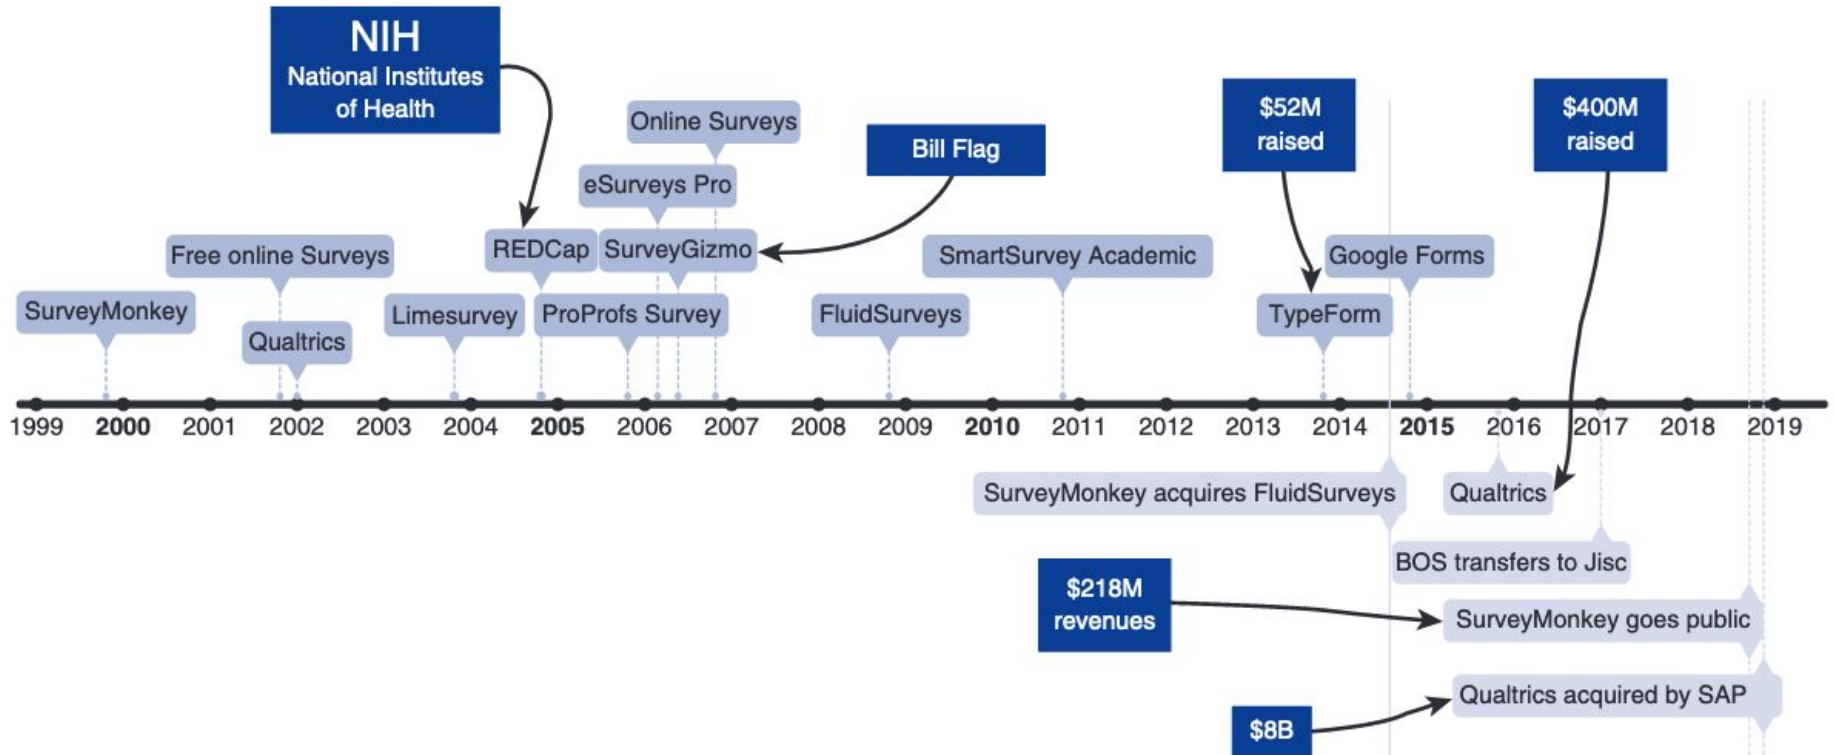

### Tools by ownership structure and charge to academics

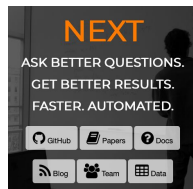

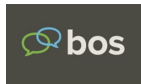

# Tools launched per year 1960 - 2020, by charge to academic

# The evolution of tools for surveying, 1999-2019

## Design & administer the survey

## Manage consent & recruit participants

## Do more than the survey

pewmethods (R)

Delve

## Analyse the data

# The ecosystem of technologies for social science research

A SAGE White Paper

[View on GitHub](#)

[Explore sections](#)

[Get full list](#)

To download the whitepaper (2019) as a pdf, please follow this [link](#).

The underlying and updated (as of April 2020) **data** is available as csv in this repository's [data folder](#)

- December 2019 [webinar slides](#), and [recording](#).
- June 2020 [slides from ICTeSSH](#).

Both the whitepaper and the underlying data are open under CC-BY and CC0 license respectively. Please feel free to use and reuse, and contribute. Watch this space for an updated version of the white paper and the data.
